

BENEFITS OF CICD

The impact of CICD on a business

- ▶ The continuous integration pipeline catches complaining errors through building the application right after each push.
- ▶ This leads to reducing the time of fixing issues from new code.
- ▶ Reduces technical debt.
- ▶ Reduce Cost

CATCH COMPILE ERRORS AFTER MERGE

- ▶ The continuous integration pipeline run automated testing once new code is added.
- ▶ This leads to fewer bugs in production and less time in testing.
- ▶ Moreover, it helps us avoid extra costs.

CATCH UNIT TEST FAILURES

- ▶ Analyzing packages Prevents embarrassing or costly security holes.
- ▶ This saves us from losing customers trust and paying extra costs.

DETECT SECURITY VULNERABILITIES

- ▶ More features can be added easily in small chunks, without manual configurations.
- ▶ This means less time to market and an increase in revenue

DEPLOY TO PRODUCTION WITHOUT MANUAL CHECKS

THANK YOU.
